

VM LCD STAND

VITRINEMEDIA has developed its own VM STAND LCD to provide you with an optimal digital experience.

Our new VM LCD STAND allows installation fixed or laid on the floor. It is compatible with many screens on the market and can accommodate a screen in 49" or 55" format in portrait or landscape mode; or two screens one above the other in 49" or 55" formats in landscape mode only.

The VM LCD STAND is VESA 400mm or 600mm compatible. The inclination and height can be adjusted by only two screws. If necessary, the extension tube 1203922001 allows you to increase the height of the mast by 50 centimeters reaching 2 meters in total.

At the back of the product, we offer different systems of back covers: PVC, simple textile, or lighted textile. In order to have a completely discreet installation, we have added a passage at the bottom for cable management. Finally, an external video player can be mounted on the back (VESA 100mm, M4 screws provided).

BENEFITS

Color
Black Matt

Orientation
