

## VI ULTRA SLIM DOUBLE

**This dual LCD monitor stand has a clean, simple design that focuses on the content being displayed.**

The ULTRA SLIM DOUBLE is a matt black steel stand. This dual LCD monitor stand has a clean, simple design that focuses on the content being displayed. Its back cover and ultra-thin side mats hide all cables without spilling over the side of the screens. The customisable backlight cover will also enhance your office décor.

The design provides stability and security for your business. Discreet vents allow heat to escape without damaging the screen.

The stand is only compatible with two 49" or two 55" screens and requires a minimum distance of 10cm between the screen and the window.
