

VITRINEMEDIA

BE REMARKABLE

VM SUPER LIGHT

The VM SUPER LIGHT display belongs to a brand new and innovative concept developed by VitrineMedia. Thanks to its fixtures, the LED displays can be hung on the VM WALL (on the wall-mounted system), on the VM BOX (display system is set on the ground) and on cables.

The design is clean and minimalistic, and it allows people to focus more on the ads.

INNOVATIVE FIXTURES

Innovative fixture system for an easy and simple set up.

OPTIMAL SIZE

11mm thick

Size Chart [mm]

	A4	A3
a	297	420
b	250	331
c	11	11
d	22	22
e	170	170

VM WALL

The VM WALL is the perfect solution to display your advertising on your wall. Two aluminum bars hold the displays. They are discreet and elegant.

VM BOX

Set on the floor, the VM BOX host VM Super Light displays on both sides. The VM BOX can also rotate on itself (180). Easy to set-up and take down unmount, it is also very robust and easy to carry.

VM CABLE

Built for shop windows, The display panels are fixed on to two aluminum bars and two cables linked to an electrical VM RAIL. The VM CABLE makes it easy to switch between displays and it is possible to hang displays on both sides.

THE CONCEPT

Displays panels & modules compatible with 3 types of display options.
