

The VM DUO is the first double-sided screen that allows you to display your dynamic content in your storefronts and indoor spaces at the same time.

It is an ultra-slim screen with a modern design and molded edges so that only your content and your messages shine through.

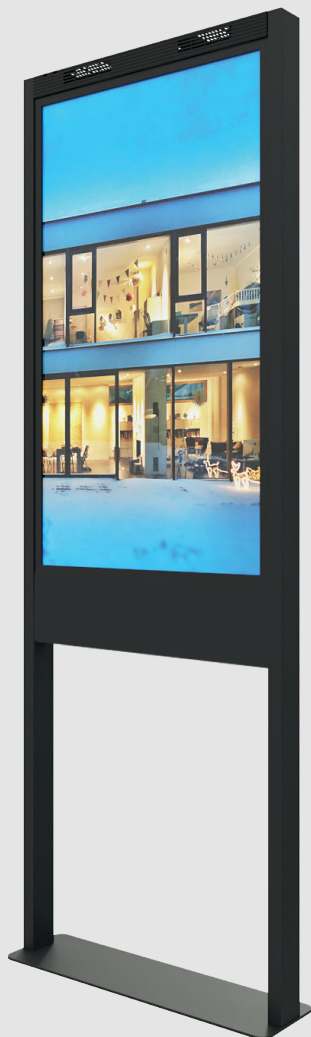

Two-in-one, it gives you the opportunity to establish seamless contact with your customers, from your storefront to the inside of your store or agency.

- On the window side, its 3000 nits screen allows you to make all your messages shine and to capture the attention of pedestrians and road traffic alike

- Indoors, its 1000 nits screen allows you to keep in touch with your customers and prospects.

Intelligent, it adapts its brightness to its environment to provide breathtaking image clarity in all circumstances.

It is available in 46 and 55 inches. VM DUO is managed via the VM Live interface, accessible through any Internet-connected device.
